Subject: U.S. Serial No. 09/605,573

Would you please search the following amino acid sequence from the aforementioned application: NH2-Leu-Asn-Ser-Trp-Gly-Cys-Lys-Gly-Arg-Ile-Ile-Cys-Tyr-Thr-Ser-COOH. This sequence is an epitope of SEQ ID NO.: 69 (aa 12-26). Would you please remove all of the inventors' (Robert De Leys, Jian Zheng) publications from the final results. Would you also limit the overall peptide length to 20 amino acids. Thanks!
